

III International Virtual Congress on Statistical Education (CIVEEST)

21 –24 February, 2019

Final Announcement

On February 21th to 24th the *III International Virtual Congress on Statistical Education (CIVEEST)* is taking place. The congress will include invited conferences/seminars and lectures, as well as contributed papers and posters dealing with the teaching of statistics, probability and combinatorics.

Those interested in taking part in the conference should register on the conference web site, <http://civeest.com>, and fill the data requested in the registration form. Registration is free. Participants have full access to all the papers since February 10th and can make questions to the authors along the conference days, using chats that will be available for each paper. These chats will be open on February 20th.

The plenary lectures, to which participants resident in Granada can attend, will be transmitted from the Instituto de Matemáticas iemath.ugr.es. The video-room web address used in the transmission of plenary lectures will be announced on the conference web page before February 20th.

The Programme for plenary lectures is given below (Spanish hour):

February 21st

- 16:00-16:30. Opening
- 16:30-18:00. [Carmen Batanero](#), University of Granada, Spain. *Treinta años de investigación en educación estocástica: Reflexiones y desafíos*.
